

DELFLIA[®] Xpress

The reliability of the DELFLIA chemistry with the convenience of continuous loading

For
laboratories
and clinics

DELFLIA Xpress represents a complete solution for prenatal screening. It is a continuous loading system providing support for 1st trimester and 2nd trimester screening. The system is fast and reliable, and is based on proven DELFLIA chemistry.

- DELFLIA technology based on time-resolved fluorescence – analytical sensitivity
- Quantitative results within 30 minutes
- Throughput 40 results per hour
- Small sample volumes
- Simple and easy to use
- Small footprint
- Random access loading of samples and kit components – run samples any time of the day

1st and 2nd trimester analytes:

- PAPP-A
- Free hCGB
- hAFP
- uE3
- hCG*

**In validation*

Leaflet not for distribution in the USA.

DELFLIA[®] Xpress

Supports changing strategies in maternal health screening

For
clinics
and
laboratories

DELFLIA Xpress is a small unit that is easy to locate in an antenatal clinic. With kits for PAPP-A and Free hCG β it supports the trend towards 1st trimester screening for Down's syndrome. Its speed and convenience make DELFLIA Xpress the ideal solution for clinics that wish to provide a "one-stop" service.

DELFLIA Xpress may be coupled to LifeCycle with Elipse, a validated and flexible data management and risk assessment package. LifeCycle has multiple installation and interfacing options.

The 1st trimester assays, DELFLIA Xpress PAPP-A and DELFLIA Xpress Free hCG β have been approved by the Fetal Medicine Foundation (FMF).

The 1st trimester assays and the whole DELFLIA Xpress system have also been approved by Health Canada.
